iCOST

System Modules

1610 Woodstead Court, Suite 320
The Woodlands, TX, 77380, USA

Office: +1 713.339.9070
Fax: +1 832.553.8067

SECURITY MODULE

User Securities based on roles and clients is built into the tool's administration to allow separation of "read only" and "read write" access by client.

SECURE WEB ACCESS
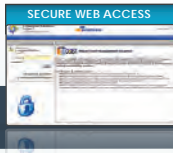

CHANGE MANAGEMENT

iCOST™ has the functionality of an effective change management process built into the cost management process. This module uses pro formas, status registers, and change tracking to capture and report on all variation orders raised during the life of the project.

CHANGE MANAGEMENT

STATUS REPORTING

Report Progress based on work breakdown, Man hours, Units, Days ...etc

HISTORY/DATA FREEZE

The Data Freeze can be based on:
- Calendar Based Frequency
- Specified Event Trigger

Frozen data are all time stamped and can be accessed as needed.

(Auto Input)

WBS Code	Estimate	Control Budget	Current Budget	Changes Approved	Forecast Changes	Forecast	Actual Costs	Committed Costs

BUDGET MODULE

Work Breakdown Structure (WBS) w/ 10-Tier drill down functionality

Initial project set-up with WBS & associated budget entries

EXTERNAL FINANCE/ ACCOUNTING SYSTEM

Auto screened upload from current accounting system

QUICK VIEW MODULE

Cost data can be viewed temporarily in a different currency in all budget and revenue views.

"WHAT-IF" SCENARIOS

- Run 'As-is', 'What-if' or 'To-be' cost project analysis without affecting base/current data.
- Analysis can be saved and reports run off it.

ANALYSIS / REPORTING MODULE

- Standard Reports are auto generated on a calendar based schedule & stored within the tool
- Analysis reporting function which allows user generated ad-hoc reports
- Report Dashboard

REVENUE MODULE

- Capture contract defined compensation types per cost accounts
- Manual or automatic calculation of Revenue
- Report the project's current revenue, revenue forecast changes, agreed change orders to revenue and actual revenue as it is being captured

Revenue Overview
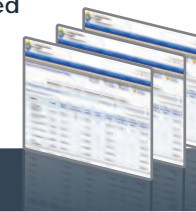

CALENDAR MODULE

- Track and report on any key financial milestone dates associated with material deliveries, payments...etc
- Set auto alerts/Event remainders
